• Laravel (PHP)
• MySQL (Basic)

## SOFT SKILLS

• Problem Solving
• Quick Learner
• Team Collaboration
• AI-assisted Workflow

## OBJECTIVE

Passionate Frontend Developer with ~1 year of hands-on experience building responsive, animated, and API-driven web applications. Seeking to join a fast-paced startup to contribute across the full stack, explore cutting-edge technologies, and make a meaningful impact from day one. Strong advocate for using AI tools to ship faster and smarter.

## WORK EXPERIENCE

### Frontend Developer
**Nivesh Mangal**  |  *April 2025 – Present*

- Built fully responsive interfaces using HTML, CSS, Tailwind CSS and JavaScript, ensuring seamless performance across all devices.
- Created animations and micro-interactions using GSAP, elevating user engagement and visual appeal of the product.
- Integrated and managed API keys securely, connecting frontend with backend services and third-party APIs.
- Developed reusable UI components with Tailwind CSS, improving design consistency and reducing development time.
- Leveraged AI tools to boost productivity and maintain high code quality throughout the development cycle.

## LIVE PROJECTS

### TechWisdom — Ed-Tech Platform  ↗ Live
**Stack:** *HTML, CSS, JS, Tailwind, Laravel, PHP*

- Educational platform for browsing and purchasing courses, with an admin panel for managing student applications.
- Implemented secure authentication, course management, and form data storage using Laravel backend.

### WealthOrder — Investment Platform  ↗ Live
**Stack:** *HTML, JS, Tailwind, Laravel, Api integration.*

- Financial platform with an interactive investment calculator and an AI-powered chatbot for user guidance.
- Mobile-first responsive design built for a diverse user base across devices and screen sizes.

### Nuxus — Tech Agency Website  ↗ Live
**Stack:** *HTML, CSS, JS, Tailwind, GSAP*

- Premium agency website with high-performance GSAP animations, scroll-based effects, and interactive UI elements.
- Optimized performance and page load speed achieving fast render times across all major browsers.

### InstantPAN Apply — E-Governance Portal  ↗ Live
**Stack:** *HTML, CSS, JS, Tailwind, Laravel, PHP*

- Government-service portal for citizens to apply for PAN cards and Voter IDs entirely online with multi-step form validation.
- Laravel backend for form processing, admin dashboards, file uploads, and application status tracking.
